AREAS OF SUPPORT

Focus on Members

Affiliated and Managed Organizations of ASPS

ASPS has worked to expand and deepen its connections in the Plastic Surgery space and, in doing so, has brought on several affiliated and managed organizations. Working as a partner, ASPS helps each organization ensure they have a successful program year after year by leveraging ASPS experience and staff.

Affiliated Organizations

- *Arizona Society of Plastic Surgeons (AzSPS)*
- *International Society of Plastic Regenerative Surgeons (ISPRES)*
- *Migraine Surgery Society (MSS)*
- *Mountain West Society of Plastic Surgeons (MWSPS)*
- *Virginia Society of Plastic Surgeons (VASPS)*

Managed Organizations

- *International Confederation of Plastic Surgery Societies (ICOPLAST)*
- *New York Regional Society of Plastic Surgeons (NYRSPS)*

Clinical Meetings

Clinical Meetings created and hosted by ASPS provide quality accredited education to practicing physicians, residents, medical students and allied health professionals. ASPS is the trusted source for the most leading-edge, scientifically-sound and diverse educational programming within the plastic surgery specialty.

Practice Management

Successfully operating a plastic surgery practice demands that both surgeons and staff be open to continuous change, innovation and improvement to stay competitive in an ever-shifting marketplace. ASPS and The PSF support plastic surgeons and all allied health professionals in the fluctuating landscape of practice management.

Wellness

ASPS Wellness initiatives are specifically targeted to help combat the rising epidemic of physician burnout. Unlike stress, burnout does not allow a physician to take a few days off to “recharge their batteries.” Instead, lifestyle and practice change is ultimately required to return a physician to peak performance. Burnout has been linked to lower quality of care, higher medical error rates, lower patient satisfaction rates and higher malpractice risk. We seek to change that through ASPS Wellness Initiatives.

Women Plastic Surgeons

The WPS Forum empowers female plastic surgeons within the Society through networking, education, advocacy and mentoring. The WPS forum works to promote female plastic surgeons and increase their involvement within both organized medicine and plastic surgery as a whole while simultaneously advancing the mission of ASPS.

AREAS OF SUPPORT

Focus on Members

ASPS Global Partners

ASPS has almost 3,300 international members from 105 different countries. ASPS has signed formal agreements (Memorandum of Understanding) with national plastic surgery societies around the world that have achieved a high standard in plastic surgery.

This agreement provides for mutual recognition of standards, governance and ethics; and acknowledges the eligibility of all members of each National Society to join the other as an International Member.

Our societies are entering with a spirit of mutual cooperation and sharing of information, acknowledging that each country wishes to participate jointly in improving standards and cooperation by plastic surgical organizations around the world.

Focus on Patients

Patient Safety

ASPS is in a unique position to leverage data generated by our surgeons in order to identify opportunities for the advancement of patient safety within the specialty. ASPS education and initiatives use this data to create effective programming that positively impacts patient outcomes.

Public

ASPS is dedicated to providing timely and accurate educational opportunities for the public regarding reconstructive and aesthetic plastic surgery procedures. From patient education products to general education, ASPS works to ensure that potential plastic surgery patients are informed about their opportunities and choices before making decisions.

AREAS OF SUPPORT

Focus on the Future

Residents

Residency comes with the unique challenge of focusing on clinical education and training while preparing to launch a practice. ASPS helps residents through residency and onto a successful career.

THE PLASTIC SURGERY
FOUNDATION

The Plastic Surgery Foundation

The Plastic Surgery Foundation supports the research and international activities of ASPS members. The PSF works alongside ASPS to support innovative ideas, teach researchers how to articulate the relevancy, impact and possibilities of those ideas, bring the right people together so that tested and meaningful ideas can reach the marketplace and assist volunteers as they take those new ideas along with tried-and-true procedures to all corners of the world.

Research

The PSF is committed to advancing high-quality clinical and health services research that promotes evidence-based medicine in plastic surgery. Through clinical trials, registries, research grants, awards, scholarships and fellowships, The PSF is designed to be the leading facilitator of evidence-based medicine with a focus on improving quality of care and patient safety.

Advocacy

Advocacy is a top priority for the American Society of Plastic Surgeons, and PlastyPAC plays an integral role in our advocacy efforts. It allows the society to support, educate and influence federal candidates who support the public policy goals of ASPS.

Digital Reach

The ASPS Education Network (ASPS EdNet) is a centralized, interactive educational website, created by surgeons for surgeons. ASPS University provides virtual courses for plastic surgeons and other medical professionals on both practice management and clinical topics. The *Enhance Your Practice* podcast serves as an educational appetizer for plastic surgeons and office professionals looking for practice management information on the go. The *Plastic Surgery Hotseat* is a clinical podcast featuring controversial topics or differing opinions on procedural paths.

In addition, ASPS provides a number of webinars and virtual meetings, extending its digital outreach to thousands of plastic surgeons around the world.

FOCUS GROUP

This is the ultimate advisory board opportunity for any company focused on products for plastic surgeons. How valuable would it be for you to spend one dedicated hour with key experts and opinion leaders in plastic surgery? A PSF Industry Focus Group offers the opportunity to not only have in-depth discussions with 6-10 plastic surgeon thought leaders, but also to receive unbiased feedback on the topic of your choice.

The Focus Groups are ideal for:

- Start-up companies with a product developed to serve the plastic surgery field
- Plastic surgery industry partners with an innovative product or idea for a product not yet on the market
- Any company wishing for unbiased feedback about current or planned products or future product ideas

A dedicated PSF staff member will work with you to ensure your session is tailored to meet the specific goals of your company and a session moderator will help you achieve a productive, beneficial session. As an added benefit, all proceeds from the Industry Focus Group Sessions go directly to support research funded by The Plastic Surgery Foundation. Your participation supports the research efforts of our Society, while providing you with high-level input from the ASPS community.

PSF INDUSTRY FOCUS GROUP:

In Person Focus Group: \$17,500

ASPS provides:

- A 60-minute focus group

**Supporter provides their NDA and ASPS staff review to ensure it aligns with ASPS policies*

***ASPS to send sponsor-developed and/or ASPS-developed survey/pre-work.*

****ASPS to obtain consent from members to share address information.*

REGISTRIES AND CLINICAL STUDIES

The Plastic Surgery Foundation (PSF) and American Society of Plastic Surgeons (ASPS) are facilitating evidence-based medicine and quality improvement by bringing together plastic surgeons, other specialists, and government leaders who seek to answer important questions that can best be addressed through broad registry participation. The Plastic Surgery Registries Network (PSRN), the registry suite of ASPS/PSF, has been actively collecting plastic surgery data since 2002. The program has evolved more than 20 years from one registry to five registries, now collecting data on plastic surgery procedures, outcomes, devices, and rare diseases. The goal of the PSRN is to help plastic surgeons identify safe, effective treatments for their patients. PSRN registries also provide a means for quality reporting and practice improvement activities.

Opportunities Currently Exist to Support the Following ASPS/PSF Registries

The Plastic Surgery Registries Network (PSRN) is the registry suite of ASPS/PSF that has been actively collecting plastic surgery data since 2002. PSRN empowers practices to make data-driven improvements to outcomes by collecting and compiling data on fat grafting, breast implants and other plastic surgery procedures.

Tracking Operations & Outcomes for Plastic Surgeons (TOPS) is a HIPAA compliant, secure and confidential national database of plastic surgery procedures and outcomes. Launched in 2002, this evidence-based tool provides the ability to efficiently follow patients over time and was designed to assist plastic surgeons with clinical decision making and practice improvement by identifying clinical strengths and areas needing improvement on an individual level with national benchmarking. TOPS contains more than 1.5 million plastic surgery procedures with nearly 20 years in clinical use. All ASPS members and candidates for membership who practice in the U.S. are encouraged to participate in the TOPS program.

The Patient Registry and Outcomes For breast Implants and anaplastic large cell Lymphoma etiology and Epidemiology (PROFILE) Registry is a collaboration between ASPS, The PSF, and the FDA to better understand the role of breast implants in the etiology of anaplastic large cell lymphoma (ALCL) in order to determine whether an association exists between the device and the disease.

A commitment to safety and better patient outcomes is the very bedrock of our specialty. The Plastic Surgery Foundation has developed The National Breast Implant Registry (NBIR) in collaboration with the FDA and breast implant device manufacturers to help advance that commitment. The NBIR is a quality improvement initiative and safety surveillance registry that collects clinical, procedural and outcomes data at the time of operation and any subsequent reoperations for all U.S. patients receiving breast implants.

General Registry for Autologous Fat Transfer (GRAFT) is a web accessible database for tracking procedures and outcomes of fat grafting performed for aesthetic or reconstructive indications. All board-certified plastic surgeons within the U.S. and ASPS members in Brazil and Canada are eligible to participate. Data collected in GRAFT provides insight into safety and efficacy of fat grafting procedures and can be used for physician benchmarking and quality improvement activities. The collective data in GRAFT will lead to discovery of new trends, improve patient outcomes and have a broad impact on the future regulatory decisions. GRAFT collects clinical, procedural and outcomes data at the time of operation and any subsequent reoperations for all U.S. patients receiving breast implants.

Corporate Support Opportunities

Opportunities available for collaboration and sponsorship. Contact us if you are interested in learning more.

RESEARCH SCHOLARSHIPS AND AWARDS

The Plastic Surgery Foundation (PSF) supports investigators from the beginning of their careers, during residency, on up to well-established plastic surgeons by offering a comprehensive research grant program focused entirely on advancing innovation and clinical practice in plastic surgery. The PSF offers research and training grants ranging from \$10,000 to \$50,000. Every year, The PSF receives between 125 and 150 applications requesting more than \$3 million dollars in funding for clinically relevant research and training. Support from corporate partners would increase the number of worthwhile requests that could be funded.

Here are some of the incredible research and training opportunities currently offered for plastic surgery residents, fellows and established plastic surgeons. The PSF welcomes the opportunity to collaborate with corporate partners on these or other worthy research and training initiatives.

PSF Aesthetic Plastic Surgery Research Grant

The PSF Aesthetic Plastic Surgery Research Grant is intended to support plastic surgeons in pursuing research in aesthetic/cosmetic plastic surgery.

Proposals should address aesthetic/cosmetic research topics and include focused research questions. The goals of the research may range from pilot projects to collect preliminary data to support larger future grant proposals, up to more advanced research questions that may lead to findings and results to have a more immediate impact on patient care. The PSF encourages new research concepts and novel ideas. Subject areas may include but are not limited to the following most common contemporary procedures in aesthetic plastic surgery: breast augmentation, liposuction, nose reshaping, eyelid surgery, tummy tuck and facelift.

Current Amount & Duration: Up to \$25,000 for one year pilot projects

PSF Directed Research Grant - Breast Implant Safety

Studies designed to assess breast implant safety, including local and systemic complications and illnesses related to breast implants, will be considered. Proposals that examine implant surveillance techniques and imaging are also invited. Basic, translational and clinical research studies are all within scope. Applications will be evaluated based upon the importance of the study question, soundness of study design, demonstration of study feasibility through preliminary/pilot data, the quality of the investigator team and use of appropriate statistical and analytic methods.

Current Amount & Duration: Up to \$50,000 for projects up to two years

Research Fellowships

The purpose of the Research Fellowship Grant is to encourage research and academic career development in plastic surgery. This grant is for salary support only for a Resident or Fellow to obtain training and experience in research, under the guidance of an experienced mentor. The application must describe a structured research training plan, in addition to a research project. Only already funded research projects will be considered.

Amount & Duration: Up to \$50,000 for one year to be used for salary support only

RESIDENT RESEARCH

March 21, 2025

THE PLASTIC SURGERY FOUNDATION MATCH DAY CAMPAIGN

Did you know?

Did you know The Plastic Surgery Foundation has two research grant programs specifically targeted at funding residents and junior faculty? The Combined Pilot Research Grants and Pilot Research Grants programs (see: ThePSF.org/Grants) were created to provide funding for preliminary or pilot phase research projects that will grow into larger grant proposals in the future or can be carried forward into an academic career.

How Your Company Can Help

From Feb. 21 to March 21, 2025,, The Plastic Surgery Foundation will conduct a large fundraising campaign targeted at the American Society of Plastic Surgeons membership. Connect your brand to the excitement of Resident Match Day and the incredible opportunity of The PSF Pilot Research Grants by becoming a campaign sponsor.

SENIOR RESIDENTS KITS

QUARTERLY SUPPORTER BENEFITS: \$12,500 PER QUARTER

Senior Residents Kits help prepare resident surgeons for life beyond residency. The kits (one per quarter) include essential practice resources such as a complimentary subscription to CSAT, scrubs, ASPS patient education brochures and more. The sponsoring industry partner will have an exclusive opportunity to place informational inserts into the kits and ASPS will provide the sponsor with a list of senior residents.

PLASTIC SURGERY ACCELERATOR SPONSORSHIPS

ASPS ACCELERATOR PROGRAM

In an era marked by rapid technological advancements and global connectivity, the ability to innovate and disrupt traditional paradigms has become the lifeblood of progress. ASPS works to catalyze the exchange of ideas, foster collaboration and empower change-makers to turn their creative visions into reality. We provide a space where technology enthusiasts, investors, mentors and dreamers converge to help realize your innovative ideas and entrepreneurial drive.

The ASPS Accelerator is a multi-pronged approach to supporting the diverse needs of innovative plastic surgeons working to provide better solutions for their patients. ASPS provides the following benefits to its members:

- **Innovation & Entrepreneurship Hub** - Our hub is a dynamic platform designed to celebrate and accelerate this spirit of innovation. Whether an aspiring entrepreneur seeking inspiration, a seasoned disruptor looking for the next big thing or a curious individual eager to explore the cutting edge, this is the right place to start.
- **ASPS/MTI Accelerator Program Plastic Surgery Track** – ASPS has partnered with the world's largest accelerator for medical device, digital health, and diagnostic companies. Driven and visionary entrepreneurial surgeons, along with dedicated residents of the American Society of Plastic Surgeons who are in the start-up or early (up to C-round funding) commercialization stages of creating a medical device, diagnostic or digital health company can apply to be one of five ASPS-sponsored companies to compete for a share of \$500,000 in cash prizes and awards through the MedTech Innovator accelerator program. In the last three years, at least one ASPS track company has placed in the top five of all MedTech Innovator competitors showcasing the incredible strength of submissions in the plastic surgery track.
- **ASPS Inventor's Challenge at Plastic Surgery The Meeting 2025** – Hosted annually, the ASPS Inventor's Challenge features plastic surgeon innovators showcasing their medical device inventions and vying for the title of Innovator of the Year!
- **TIDE Talks at Plastic Surgery The Meeting 2025** – The TIDE Talks are like the well-known TED Talks with a focus on technology, innovation, disruption, and entrepreneurship. They cover a wide range of topics, including new technologies, business strategies and innovative ideas that are transforming the way we live and work. The speakers may be proven visionaries outside the field of plastic surgery or possibly our own colleagues who have disrupted the industry.
- **ASPS/MedTech Innovator Plastic Surgery Track Showcase at Plastic Surgery The Meeting 2025** – The top five companies from the ASPS/MedTech Innovator are highlighted as part of Plastic Surgery The Meeting. As part of this experience, the companies take part in a showcase session outlining their innovations and plans for the future.

BREAST RECONSTRUCTION AWARENESS CAMPAIGN

The Breast Reconstruction Awareness (BRA) campaign is sponsored by the American Society of Plastic Surgeons (ASPS) and The Plastic Surgery Foundation (The PSF). The Breast Reconstruction Awareness Campaign educates, engages and empowers women to make the reconstruction decision that is best for them following a diagnosis with breast cancer. That involves informing women, family members, caregivers and the media that the breast cancer loop remains open until a woman is informed of breast reconstruction options.

INSIGHTS FROM INDUSTRY

Don't wait for a meeting to share your message with ASPS members! Conduct an **Insights from Industry** webinar with ASPS to share emerging science, product updates and launches, and more. Just like an in-person symposium, your company would construct the content of the webinar but ASPS will provide the platform, facilitate the registration process, and send out emails to promote the program. In addition, the webinar is recorded and placed on our online education platform, ASPS Education Network (ASPS EdNet).

RESIDENT EDUCATION

Event Overview

Online Self-Directed / Group Learning Program

Number of U.S. Resident Enrollees: 1,250

Number of International Resident Enrollees: 625

Target Audience: Residents

Used by more than 120 domestic training programs and residents from around the world

The Resident Education Center (REC) has been integrated into the curricula of most U.S.-based training programs for several years. The REC includes 88 modules of plastic surgery self-study content covering the breadth of plastic surgery practice.

The modules open with an outline of key section learning points and a required pre-test to gauge the base level of knowledge prior to exposure to the learning materials. Following the pre-test, the user is provided with at least five "best of" clinical journal articles to read, an audio-PowerPoint lecture to review, sample oral board cases to consider and, in many cases, surgical video to watch. Finally, the user is provided with a reading list of additional resources to study and a post-test, which includes remediation via discussion and references.

RHINOPLASTY SYMPOSIUM

Hosted in advance of the PSTM, the Rhinoplasty Symposium will take a deep dive into one of the cornerstones of plastic surgery as ASPS teams up with The Rhinoplasty Society (TRS) to offer this amazing half-day program to an expected 100 attendees.

This year's program brings together the traditional didactic expertise attendees have come to expect from ASPS and TRS - experts in the field to discuss a hybrid approach to rhinoplasty utilizing precision and preservation techniques with an emphasis on optimizing patient outcome results. Attendees will learn how to manage and prevent complications and walk away with key rhinoplasty pearls and pitfalls to avoid.
