** Indicates a new measure that does not yet have a benchmark or measure that was revised substantially to negate the original benchmark. Reporting these measures can only earn 3 points each in 2021 for small practices (practices over 15 clinicians earn only 1 point). However, you can report as many measures as you wish. The top 6 will be used to calculate your MIPS Score. Any additional data will help in determining benchmarks for the future.

^ Indicates measures in the QCDR for Quality Improvement purposes only. These are not available for MIPS reporting.
